

Apply now for Student Job: Design (w/m/d)

Start: now!

About Flexora

#Who we are

We are a start-up from the Institute of Applied Photophysics at the TU Dresden, from which several successful companies have been founded - among them Novaled and Heliatek. In the meantime, we have built up a broad network of industrial partners, supporters and investors. In order to master the further steps, we are now looking for reinforcement in the area of marketing and design.

#What we do

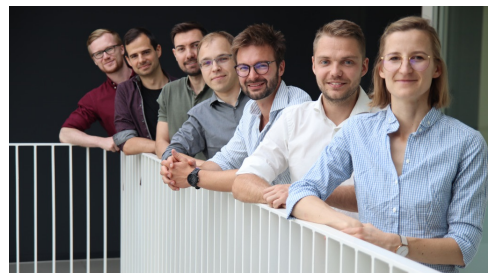

By printing films with organic electronics, we produce flexible and configurable sensor films. This makes it possible for the first time to monitor plants over a large area and in real time. A world first that is in high demand.

#Why that holds great potential

Data and especially real-time data are the basis for the automation and digitalization of processes in industry and business. We are addressing this fast-growing market with our sensor foils and aim to become the international standard for plant monitoring in the medium term.

Your tasks

- Further development and implementation of a professional and convincing visual communication strategy (corporate identity)
- Content creation for LinkedIn and Co.
- Creation of presentation material (pitch deck, business cards, posters)

What you should bring along

- Interest/experience in marketing, graphic/communications, design or media design
- Sense for colors, shapes and typography
- Proficient in the use of the German and English language
- Experience in the use of image editing programs desirable

We offer

- Student Job for 6-12 months, 5h/week
- Work when and where you want
- young, motivated and ambitious startup

Haben wir Dein Interesse geweckt?

Dann schicke uns Lebenslauf und Zeugnis mit einem kurzen Anschreiben an diana.noepel@flexora.de. Falls du Fragen hast, erreichst du uns unter der Telefonnummer 0351/463 42414 (Mo.-Fr. von 7 bis 17 Uhr). Wir freuen uns auf Dich!
